Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3744

1. Applicant's remarks regarding Groups I and II are persuasive. Thus, claims 1-15 will be examined together.

2. Claims 16-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on April 27, 2005.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-6 and 8-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wong et al. Wong et al is considered to disclose a first refrigeration system or module 12 for delivering a first chilled refrigerant, and a second refrigeration system or module 1 for delivering a second chilled refrigerant to a thermal transfer fluid 8, 9. However, Wong et al does not disclose the recited temperatures or the second refrigerant having a boiling point lower than the first refrigerant. The recited process temperatures are considered to be a matter of obvious choice to one of ordinary skill in the art, as no criticality or unexpected results are seen or have been disclosed for the range of temperatures recited in claim 1. Furthermore, one of ordinary skill in the refrigeration art would be able to achieve the recited temperature range without undue experimentation. Also, the recitation of the second refrigerant as having a lower boiling point than the first refrigerant is considered to be a matter of obvious choice, as again

no criticality or unexpected results are seen for that limitation. Again, one of ordinary skill in the refrigeration art, using only the disclosure of Wong et al would be able to use any combination of refrigerants necessary to achieve the desired result.

5. Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. In claim 6, line 4, the question mark should be deleted.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William E. Tapolcai whose telephone number is (571) 272-4814. The examiner can normally be reached on Mon. - Thurs., 6:30 to 5.
